Education

Panipat Institute of Engineering and Technology (KUK)

Aug 2022 – Jun 2025

Bachelor of Technology in Computer Science and Engineering

Panipat, Haryana

Relevant Coursework: Data Structures, Computer Networks, Operating Systems, Database Management, Object-Oriented Programming, Compose Multiplatform

Experience

Bharat Electronics Limited

Oct 2025 – Present

Trainee Engineer – Radar SBU

Ghaziabad, Uttar Pradesh

- Gained hands-on exposure to radar surveillance systems, including ATC display subsystems integrated with SRE/ATC radars; supported digital map generation, runway alignment, and airspace visualization configuration.
- Assisted senior engineers with installation, integration, configuration, and commissioning of radar-based ATC display systems, supporting testing, verification, and troubleshooting of mission-critical systems.
- Automated day-to-day operational tasks using shell scripting on RHEL 8.2 systems, reducing manual intervention by building reusable scripts for monitoring and validation.
- Developed working knowledge of system integration across radar sensors, ATC display systems, and controller workstations in real-time, safety-critical aviation and defence environments.

Home Credit India

Aug 2025 – Oct 2025

Intern

Gurugram, Haryana

- Built a Compose Multiplatform clone of an existing company Android app, extending support to both Android and iOS platforms from a shared codebase.
- Implemented Jetpack Compose Multiplatform (CMP) to develop cross-platform applications for Android, iOS, Desktop, and Web using shared UI and shared Kotlin business logic.
- Integrated Ktor for API calls, Koin for dependency injection, SQLDelight for database management, and NavCompose for navigation, successfully recreating a company Android app with extended platform support.
- Gained hands-on experience with modern Android architecture, state management, and multiplatform development workflows.

Trendloom

Oct 2024 – May 2025

Front End Developer (Freelancer)

Delhi

- Built a fully responsive, mobile-first e-commerce front end using React.js and Tailwind CSS, delivering a clean and engaging UI/UX.
- Improved site performance through code-splitting, lazy loading, and Webpack bundle-size optimizations.
- Integrated Razorpay for secure payment checkout and Cloudinary for efficient image handling and CDN delivery.
- Collaborated with designers and backend developers using Git, GitHub, and pull requests to maintain code quality and streamline version control.

Textile Company

Mar 2024 – Aug 2024

Front End Developer (Freelancer)

Panipat, Haryana

- Enhanced a real-time admin panel using React.js with a reusable, scalable component architecture to support future growth.
- Integrated RESTful APIs to enable dynamic data rendering and automated stock updates, reducing manual intervention.
- Ensured responsive design using Tailwind CSS and media queries across desktop, tablet, and mobile devices.
- Implemented Excel and PDF export features using xlsx, jsPDF, jsPDF-autotable, and file-saver, enabling one-click download of tabular reports.

Projects

BlogVerse | *Tailwind CSS, React.js, Node.js, Express.js, MongoDB, Google Gemini API, ImageKit, JWT*

2025

- Built a full-stack blogging platform using the MERN stack, integrating the Google Gemini API to dynamically generate blog content from user prompts.
- Implemented React Context API and JWT for secure, token-based session management and role-based access control for admin features.
- Engineered RESTful APIs using Express.js to manage blogs, comments, and admin authentication.

Google Docs Clone | *Next.js, Tailwind CSS, Convex, Clerk, Liveblocks, TypeScript*

2025

- Developed a real-time collaborative document editing application inspired by Google Docs, enabling simultaneous multi-user editing and document syncing.
- Integrated Liveblocks for presence awareness, live cursor tracking, and real-time collaborative editing.
- Implemented secure authentication and session management using Clerk, with protected routing and sign-up/sign-in flows.
- Designed the UI with Tailwind CSS and built all components in TypeScript for type safety and scalability.

Technical Skills

Languages: C++, Java, Kotlin

Front End: HTML, CSS, JavaScript, React.js, Jetpack Compose

Back End: Node.js, Express.js

Database: MySQL, MongoDB, SQLDelight

Frameworks/Technologies: Next.js, Tailwind CSS, Bootstrap, Redux, Context API, Ktor, Koin, Compose Multiplatform

Developer Tools: VS Code, GitHub, Android Studio

Operating Systems: Red Hat Linux, Windows

Soft Skills: Team Collaboration, Time Management, Problem-Solving
